

# WICKED Research Experiment

## Classroom 3 Experiment

**Cranks' capability of coordinating and executing multiple commands**

---

## INFORMATION

**Username:** Dzenex44

**Update:** Cranks Capability of Communication

### **Elaboration:**

**[-]** xCaitlvn gave me an experiment to do for Classroom 3, I asked her a few questions related to the Experiment as I was confused at first. The experiment is about Cranks Capability of executing multiple commands at once. I joined the game and went to find some volunteers for the experiment. After I found a volunteer, the experiment began.

## THE EXPERIMENT

**Start of Test:** XX:15

**Time log:** *(From XX:15 - XX:35 we we're just being raided over and over again, experiment actually begins at XX:35 if you wanna skip)*

- XX:15 Found a volunteer, SRD robbie.
- XX:16 He waited for me at Lab 02. When I arrived at Lab 02 I explained to him what we are doing on today's Experiment. User understood.
- XX:17 User got injected with the Flare Virus. Right after ItsJustTroller bursted into Lab 02 and massacred the Test Subject.
- XX:18 User came back and I injected him again with the Flare Virus.

- XX:19 We got raided again.
- XX:20 User got injected with the Flare Virus again.
- XX:21 User started coughing
- XX:22 We got raided again.
- XX:24 We re-united at Lab 02 and got raided again.
- XX:25 I disconnected.
- XX:25 - XX:29 I was resetting my router and fixing my internet.
- XX:32 I returned, and went to Lab 02 where we continued experimenting with hope to not get raided again...
- XX:33 We got raided again...
- XX:35 We returned to Lab 02 and the user got injected again. (Experiment actually begins now)
- XX:36 User started coughing
- XX:36 User is completely green.
- XX:37 User started vomiting blood.
- XX:38 User cranked.
- **XX:39 Experiment Starts**
- XX:39 Asked the crank to nod yes if he understands me.  
*The crank nodded yes.*
- XX:40 First Command: Nod yes 2 times, nod no 3 times and jump on the end.  
*Crank nodded 2 times yes, jumped, nodded 3 times yes, jumped.*
- XX:42 Second Command: Faces.  
Right, face | Left, face | Left, incline | About, face.  
*Crank did all the faces correctly.*
- XX:42 Third Command: Do 3 Laps around the tube, jump 2 times, nod yes when you finish all in order.  
*Crank did 3 laps, jumped 3 times and nodded yes once.*

- XX:43 Fourth Command:

Point A and B:

*Crank went from Point A to Point B 2 times.*

*Crank made 3 laps around the tube.*

*Crank jumped 2 times.*

*Crank wedged on me.*

- XX:46 Finished Fourth Command^^

- XX:47 Fifth Command:

*Crank hit each griever.*

*Crank did 1 lap around the tube.*

*Crank wedged on me.*

*Crank jumped on top of the tube.*

- XX:48 Sixth Command:

*Crank reported to WRD Storage.*

*Crank reported to the Grievers.*

*Crank reported on top of the tube.*

*Crank ran on top of the black coffins.*

*Crank wedged on me.*

- XX:49 Finished Sixth Command.

- XX:50 Seventh Command: Faces.

Left, face | Right, face | Center, face | About, face | Left, incline, | Center, face | About, face.

*Crank missed only one face^^*

XX:51 The crank has been killed.

**End of Test: XX:52**

## **Conclusion:**

[ - ] Cranks have the capability of executing multiple commands at once. They sometimes make some mistakes but they overall have good intelligence even though their brain is consumed by the Flare Virus what's surprising. The Crank did all of the commands in order and overall did excellent for an individual that's consumed by the Flare Virus. His brain shouldn't be able to remember all of the things I said or even understand me at all, as his brain is consumed by the Flare. This crank has been surprisingly good at everything, only making some minor mistakes. Seems like each crank is different from another. Some seem to have more serious symptoms than the other. Maybe because of their immune system being strong or weak. You are able to communicate with **certain** cranks, not everyone is friendly. Some are more intelligent than the other and have some humanity left in them to be able to communicate and understand us humans. An example is this crank, he had a good memory to remember all of the commands and execute them, he did indeed make some minor mistakes, but that's forgivable. This experiment was an overall pain to do as we we're being raided over and over again plus my internet jumping in and making me disconnect all the time.
